

# HOSPICE KIT

## THE BUCKET PROJECT

HOSPICE KIT

BGR Partners arrived at Rosemary's home—a little, tin shack—bearing a white five-gallon bucket. They were working with the local Kenyan church to distribute hundreds of these buckets in the area.

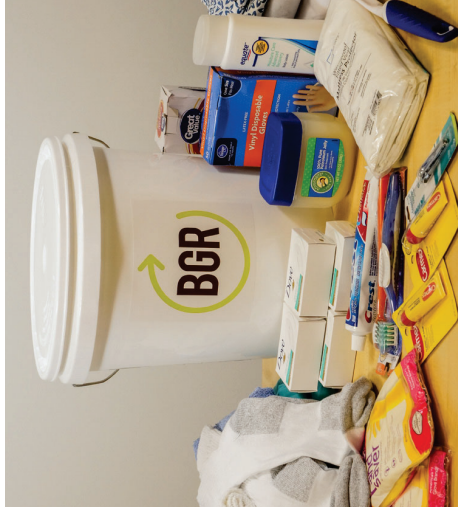

Rosemary sat down next to the bucket. She was tired. AIDS was wearing away her immune system, and she was struggling to care for her family. But, she took off the bucket's lid. She found wonders inside.

The bucket was an in-home care kit and contained items to ease pain and encourage healing for those with HIV/AIDS. Rosemary pulled out socks, lip balm, latex gloves, straws, petroleum jelly, vitamins and more. But when she pulled out bed sheets, Rosemary stopped.

Tears appeared in her eyes. She had not been able to afford fabric in a while. She had watched her friends go to the market and come back with cloth, but she never had the money to purchase such a thing. She felt special.

These men had given her so much more than a bucket. They had given her joy in the middle of her battle with AIDS.

The BGR Bucket Project allows you to improve the quality of life for homebound, terminally ill individuals. When you pack a 5-gallon bucket with medical and hygiene supplies, you provide assistance to caregivers and ease the suffering of men and women affected by illness. You shine light in a dark situation.

## 5 WAYS TO GET INVOLVED

- 1 Pray for buckets
- 2 Pack buckets
- 3 Transport buckets
- 4 Collect buckets
- 5 Distribute buckets

Churches and individuals all over the U.S. are meeting the critical needs of these families through hospice kits. Over 17,000 “buckets of love” have been sent to countries like Swaziland, Lesotho, Mozambique, and South Africa. These buckets give comfort and love to people in the final stages of debilitating diseases, and you can help!
